## Handy hints

We have included some practical advice to help you avoid some of the more common accidents and events which occur.

### Fire prevention

Over half of all fires in domestic premises start in the kitchen, so take special care when cooking with hot oil or fat and never leave chip pans unattended.

Fit smoke detectors in all rooms (special detectors are available for the kitchen) and test them on a regular basis to ensure that the batteries are working.

Check electrical equipment and follow the manufacturer's instructions in making sure that the correct fuses are used and circuits are not overloaded

Make sure that cigarettes and cigars are always properly extinguished.

### Water damage

Find out where the stopcock is and make sure that you can turn it on and off. Lag exposed water pipes and tanks in the roof area, but, remember not to use insulation material under the water tank as this may cause water in the tank to freeze.

If pipes freeze, despite your precautions, thaw them out slowly using hot water bottles; never use a blowlamp.

### Holidays and other unoccupancy

You are expected to take reasonable precautions to safeguard your premises especially when it is unoccupied or you are away. These should include not only securing doors and windows, but reducing the risk of pipework freezing by either turning off the water system and draining it down, or by maintaining low level heating, particularly overnight.

### Trees

Structural damage to buildings caused by trees and shrubs is on the increase.

Do seek advice on safe planting distances before planting trees and shrubs in your garden and ensure that they are pruned regularly.
