Dear Resident,

**Installation of a new intergrated fire alarm system –56a Lant street**

RMG London who are the managing agents of your block have written to us informing that access will be required to your home to install of an intergrated fire alarm system.

Three new fire alarm panels will be installed in each of the block entrances. New cabling will be installed between the panels to allow them to communicate with each other so should a building go into the fire the other blocks will be made aware.

New cabling will be installed from the main panel up the risers where dynamic translators will be installed to communicate with the wireless devises that are required to be installed in your property.

Please find enclosed the schedule of works which advises when access will be required into your property. If you cannot make your appointment, please contact RMG as a matter of urgency of the contact details below.

Should you have any queries regarding the content of this letter please contact RMG on 0207 598 1600 or email: [adam.norwood@rmg.london](mailto:adam.norwood@rmg.london)

Yours sincerely,

**Adnan Zubair | Home Services Manager**
